Kansai International Airport Wins MLIT Barrier-Free Environment Award

Kansai Airports is pleased to announce that we have been awarded the 19th MLIT Minister's Award for the Promotion of Barrier-Free Environments. This recognition reflects our barrier-free initiatives implemented at Kansai International Airport as part of the Terminal 1 renovation project, developed through continuous dialogue with a diverse range of stakeholders, including people with disabilities.

In these initiatives, Kansai Airports worked closely with the Kinki Subcommittee of the Evaluation Council on Facilitating Smooth Modes of Transportation. Wheelchair users, visually and hearing-impaired people and other individuals with diverse disabilities participated in multiple review meetings, follow-up sessions and on-site visits, and their feedback was reflected in the facility improvements to the greatest extent possible. In addition, the improvements were implemented not only in compliance with smooth transportation standards and barrier-free guidelines, but also with a strong focus on user perspectives.

Kansai Airports Group will continue striving to operate airports that a wide variety of passengers can use safely and securely, while supporting a comfortable air-travel experience.

Elevator car with improved door and control panel placement

Regular restroom enlarged compared to standard size

Kansai Airports was established by a consortium made up of VINCI Airports and ORIX Corporation as its core members. Kansai Airports took over the operations of Kansai International Airport (“KIX”) and Osaka Itami Airport (“ITAMI”) from New Kansai International Airport Company (“NKIAC”) and has been operating the two airports since 1 April 2016.

Kansai Airports Kobe, Kansai Airports’ wholly-owned subsidiary, took over the operations of Kobe Airport (“KOBE”) from Kobe City and started its business as an operating company on 1 April 2018.

Under the concept of “One Kansai Airports Group”, Kansai Airports group strives to continuously improve its services for all airport guests through appropriate investments and efficient operations, with safety and security being the top priority. Kansai Airports group aims to maximize the potential of the three airports, for the benefit of the communities they serve.

VINCI Airports, as the leading private airport operator in the world, manages the development and operation of more than 70 airports located in 14 countries. VINCI Airports draws on its expertise as a comprehensive integrator to develop, finance, build and operate airports, leveraging its investment capability and know-how to optimise operational performance and modernise infrastructure while bringing about their environmental transition. In 2016, VINCI Airports became the first airport operator to commit to an international environmental strategy, setting itself the aim of reaching zero net emissions (scope 1 and 2) across the network by 2050 while supporting its stakeholders’ transition.
